Education

Siksha 'O' Anusandhan (ITER)

B.Tech in Computer Science and Engineering | CGPA: 8.34 / 10.0

Bhubaneswar, India

2023 – 2027

Odisha Adarsha Vidyalaya

Class XII (CBSE) | Percentage: 74.4%

Ganjam, India

2020 – 2022

Skills

Programming Languages: Python, Java, JavaScript, MySQL

AI / ML: NumPy, Pandas, Scikit-learn, Machine Learning, CNN (Basic), Deep Learning (Basic)

Frameworks & Libraries: React.js, Bootstrap

Tools & Technologies: Git, GitHub, Docker, WebSockets

Coursework: DSA, DBMS, Computer Networks, Machine Learning Fundamentals

Projects

Customer Churn Prediction System | [GitHub](#)

2026

Python, Pandas, Scikit-learn, Machine Learning

- Developed a machine learning model to predict customer churn using structured customer datasets.
- Performed preprocessing including feature encoding, missing value handling, and feature scaling using StandardScaler.
- Implemented classification algorithms and evaluated model performance using accuracy score and confusion matrix.

Campus Placement Portal | [GitHub](#)

2026

React, TypeScript, Node.js, Express, MySQL, Docker, Tailwind CSS

- Developed a secure, role-based Full Stack CRUD web application using React and TypeScript for Student, Recruiter, and Admin portals.
- Built a robust Node.js/Express backend utilizing JWT authentication and bcrypt hashing to manage secure sessions and authorization.
- Designed and implemented a normalized MySQL database schema with optimized SQL queries to manage complex relational student and job data.
- Containerized the entire multi-tier architecture using Docker and docker-compose to ensure seamless local environment orchestration and deployment readiness.

Flap Eagle Game | [GitHub](#)

2025

Java, Swing, OOP, Event Handling

- Developed a 2D Flappy Bird-inspired desktop game using Java Swing and object-oriented programming concepts.
- Implemented physics-based movement mechanics, collision detection, obstacle spawning, and score tracking.
- Built a real-time rendering and game update loop using JFrame and JPanel for interactive gameplay.

Achievements

- Runner-up at college-level Smart India Hackathon finals, recognized for technical proficiency in real-world software solutions.
- Mentored 45+ students in Backend and Frontend development through workshops, code reviews, and debugging sessions.
